160" — Projects Images up to 160 Inches

MP4 MEDIA PLAYER — Use the Onboard Media Player to play files directly from USB

iPod / iPhone COMPATIBLE

Experience the latest in LED technology.

The AAXA LED Showtime 3D is a next generation projector employing Light-Emitting-Diodes (LEDs) and a high resolution 1280x800 DLP imager. LED light-sources have a 20,000 hour life-span (10x that of traditional projector lamps) and directly inject red, green, and blue colored light into the projection engine instead of relying on filtering white light. The result is vivid, colorful image that lasts the life-time of the projector eliminating the need to replace the projector lamp.
